Professional Summary

B.Tech CSE student interested in diverse areas of computer science, including full-stack web development, AI/ML, understanding how systems are designed, and cybersecurity. Competitive programming has helped build a structured approach to problem-solving, and I am comfortable leveraging AI tools to improve productivity without compromising my understanding of core concepts.

Education

Gayatri Vidya Parishad College of Engineering

2023 - 2027 (*expected*)

Bachelor of Technology in Computer Science and Engineering

Visakhapatnam, India

- Current CGPA: 9.17 / 10
- CSE Honors Programme - specialization in Full Stack Web Development

Experience

RINL, Vizag Steel Plant

June 2025 - July 2025

Software Developer Intern

Visakhapatnam, India

- **Project: Predictive Maintenance Scheduler (Prototype)**
- **Tech Stack:** React (TypeScript), Tailwind CSS, shadcn/ui, Recharts
- Built a predictive maintenance web application within RINL's Industry 4.0 ecosystem, which houses the Kalpataru CoE an IIoT facility with industrial IoT sensor kits, automation panels, and AI/ML platforms for equipment monitoring.
- Designed dashboards to visualize equipment usage, downtime trends, and maintenance insights, aligned with RINL's OEE and IIoT monitoring objectives.
- Gained practical exposure to how IoT sensor data pipelines feed predictive maintenance systems in a live steel plant environment.

Projects

Internships Management System - Deployed in GVP IMS | *Java, JSP, Servlets, JDBC, MySQL*

- Built and deployed a role-based internship workflow module integrated into the college IMS, used by 1200+ students and faculty members.
- Executed request processing, dynamic dashboard filtering, and certificate upload features.
- Followed MVC architecture and DAO Pattern for scalable and maintainable backend design.

Blind Coding Contest Platform - Sumedha 2026 | *React (TypeScript), Tailwind CSS, Supabase, Netlify*

- Collaboratively engineered a web-based coding platform with blind mode, used by 160+ participants during the contest.
- Implemented pool-based question system, timer tracking, multi-language editor, and leaderboard ranking based on score and time.

BuildBox – ASCII Club Workshop | *React, TypeScript, Vite, Monaco Editor, xterm.js, Pyodide*

- Built a browser-based virtual lab enabling students to learn AI/ML concepts through guided hands-on coding exercises and real-time Python execution using Pyodide.
- Developed interactive modules covering Vector Databases, Embeddings, Similarity Search, and Retrieval-Augmented Generation (RAG) with integrated Monaco Editor, terminal, progress tracking, and task validation.
- Demonstrated the platform during an ASCII Club AI/ML workshop, helping students practically understand Vector DBs and RAG pipelines through live coding sessions.

Technical Skills

Languages: Java, C, Basics of Python

Web Development: HTML, CSS, JavaScript, React

Backend Technologies: JSP, Servlets, JDBC

Databases: MySQL, MongoDB, Supabase

Tools & Platforms: Git, GitHub, VS Code, NetBeans, Netlify

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Computer Networks, System Design

Certifications & Achievements

Infosys Springboard: Python Foundation Certification

Dec 2024

IBM SkillsBuild: Web Development Course

Jan 2025

APSSDC: AWS Cloud Foundations - EC2, S3, IAM, VPC

Mar 2025

TCS CodeVita Season 13: Global Rank 13,349 (Top 9%)

Feb 2026

HackerRank: 5★ in Java, 4★ in C

Competitive Programming: Solved 250+ problems on LeetCode, CodeChef, and HackerRank
